Education:

Ph.D. 1993 The Ohio State University, Columbus, Ohio; Major: Psychobiology
M.A. 1989 The Ohio State University, Columbus, Ohio; Major: Psychobiology
B.S. 1988 The Ohio State University, Columbus, Ohio; Major: Zoology

Professional Experience:

2020-present Professor, Department of Psychology, Northeastern University, Boston, MA
2020-present Director, Interdisciplinary Affective Science Laboratory, Department of
Psychology, Northeastern University, Boston, MA
2020-present Courtesy (without compensation) Appointment, Bedford VA Medical Center,
Center for Healthcare Organization and Implementation
Research, Bedford, MA
2019-2020 Research Professor, Department of Psychology, Northeastern University,
Boston, MA
2019-2020 Director, Social and Community Reintegration Research (SoCRR)
Program, Edith Nourse Rogers Memorial VA Hospital, Bedford, MA
2016-2020 Fellowship Corresponding Co-Director, CHOIR, Bedford VA Hospital, Bedford,
MA
2010-2020 Co-Director, Interdisciplinary Affective Science Laboratory, Department of
Psychology, Northeastern University, Boston, MA
2010-2020 Research Physiologist, Edith Nourse Rogers Memorial VA Hospital, Center for
Healthcare Organization and Implementation Research, Bedford, MA
2016-2019 Fellowship Co-Director, Social and Community Reintegration Research (SoCRR)
Program, Edith Nourse Rogers Memorial VA Hospital, Bedford, MA
2010-2020 Research Physiologist, Edith Nourse Rogers Memorial VA Hospital, Center for
Healthcare Organization and Implementation Research, Bedford, MA
2010-2019 Research Associate Professor, Department of Psychology, Northeastern
University, Boston, MA
2006-2011 Associate Professor of Psychiatry, New Jersey Medical School,
University of Medicine and Dentistry of New Jersey, Newark, NJ
2003-2013 Faculty, Graduate Program, Rutgers University - Newark, Newark, NJ
2005-2010 Associate Director for Research, War Related Illness and Injury Study
Center, Department of Veterans Affairs New Jersey Healthcare
System, East Orange, NJ
2004-2010 Faculty, Integrative Neuroscience Program, Graduate School of
Biomedical Sciences, New Jersey Medical School,
University of Medicine and Dentistry of New Jersey, Newark, NJ
2001-2010 Research Physiologist, Department of Veterans Affairs New Jersey
Healthcare System, East Orange, NJ
2002-2006 Assistant Professor of Psychiatry, New Jersey Medical School,

1995-2001 University of Medicine and Dentistry of New Jersey, Newark, NJ
Assistant Professor of Psychology, Department of Psychology,
Pennsylvania State University, University Park, PA

1999-2001 Affiliate Faculty, Neuroscience Option of the Integrative Biosciences
Graduate Program (Life Sciences Consortium), Pennsylvania State
University, University Park, PA

1993-1995 Postdoctoral Research Fellow, Department of Psychiatry, College of
Physicians and Surgeons, Columbia University, New York, NY

1988-1993 Graduate Research Associate, Department of Psychology, Ohio State
University, Columbus, OH

1990-1992 Graduate Teaching Associate, Department of Psychology, Ohio State
University, Columbus, OH

Research Support:

Active Grants:

Army Research Institute W911NF-16-1-0191; PIs: **K. Quigley** & J. Wormwood, Individual Differences in Emotional Experience and Cognitive Performance, 05/16/2016 – 05/15/2022. \$2,844,554 (total costs), Quigley: 2.4 person months/year

NIH-NIMH R01MH113234, PIs: Barrett/Isaacowitz, Co-I: **Quigley**, Affect Regulation and Beta Amyloid: Maturational Factors in Aging and Age-Related Pathology, 7/1/2017-6/30/2022. \$3,872,599 (total costs), Quigley: 0.5 person months/year

NIH-NCI 1U01CA193632-01A1, PI: Barrett, Co-I: **K. Quigley**, Fundamental Subcortical Mechanisms of Affective Processing, 04/22/2016-04/21/2022 (NCE), \$3,180,229 (total costs), Quigley: 1.2 person months/year

NIH-NIMH R01MH109464, PI: Barrett, Subaward PI: **K. Quigley**, Ovarian effects on intrinsic connectivity and the affective enhancement of memory, 04/2017-04/2022, \$3,212,205 (total costs), Quigley: 0.06 summer months/year

NIH-NCI 1R01CA258269-01, PI: H. Poghosyan, Co-I: **K. Quigley**, Longitudinal mixed method investigation of social networks and affective states as determinants of smoking behavior among cancer patient, 10/01/2021-06/30/2026, \$2,970,517 (total costs), Quigley: 0.4-0.6 person months/year

Northeastern University Tier I Research Grant, PI: D. Levac, Co-PI: **K. Quigley**, L. Barrett & S. Ostadabbas, Mentored Award: Novel methods to quantify the affective impact of virtual reality for motor skill learning, 07/01/2020-12/30/2021, Quigley: 0.0 person months.

Completed Grants:

VA Rehab Research & Development 1 I21 RX003029-01A1 PI: J. Irene Harris, Co-I: **K. Quigley**, Assessing Moral Injury in Veterans as part of a Chaplain-Delivered Spiritual Assessment: Implications for Social and Community Rehabilitation. 08/01/19-07/31/21. \$155,035 (total costs), Quigley: 1.2 person months/year

VA Rehab 1 I21 RX002875-01A1 PI: Megan Kelly, Co-I: **K. Quigley**, A Web-Based Tobacco

Research & Development Cessation Treatment for Veterans with Mental Health Disorders. 12/2018-02/28/21, \$200,000, (total costs), Quigley: 0.6 person months/year

Dep't of Defense Strengthening Health and Improving Emotional Defenses (SHIELD) (Subcontract PI: L.F. Barrett, Co-PI: **K. Quigley**). Sub-contract with Charles River Analytics. 2/27/17-3/18/21 (may be extended via pending third option), \$594,627 (total costs), Quigley: 2.0 person months/year for final 2 years (post-2021).

VA-Rehab R&D D-1873-F, PI: **K. Quigley**, Center for Social and Community Reintegration Research, 05/14/2015-05/15/2020. \$1,539,543 (total costs), Quigley: 3.0 person months

Boston Roybal Center for Active Lifestyle Interventions Pilot Study, PI: **K. Quigley**, Mobile Intervention to Improve Functional Health and Engagement of Post-9/11 Veterans with Chronic Insomnia: Does Enhancing Physical Activity Help? 6/01/2017-5/31/2019. \$39,890 (total costs); Quigley: 0.24 person months. Under National Institute on Aging, Grant #P30 AG048785 (PI: Margie Lachman), [ClinicalTrials.gov: NCT03305354](https://clinicaltrials.gov/ct2/show/study/NCT03305354)

VA-Clinical Sciences R&D I01CX001053, PI: McAndrew, Bedford VA Site PI: **K. Quigley**, Cognitive Rehabilitation for Gulf War Illness, 07/01/2014-06/30/2019. \$1,500,000 (total costs), Quigley: 1.8 person months/year

NSF BCS-1422327, PIs: **K. Quigley** & J. Wormwood, Collaborative Research: Threat Perception Following Mass Violence Events, 11/01/2014-10/31/2017. \$305,177 (total costs), Quigley: 2.5 calendar month/year

Northeastern University Tier I Research Grant, PI: Sarah Ostadabbas, Co-PI: **K. Quigley**, Decoding Situational Empathy: A Graph Theoretic Approach Towards Introducing a Quantitative Empathy Measure, 07/01/2017-9/30/2018. \$50,000 (total costs), Quigley: effort donated.

Mind & Life Institute SRA 3505-MLI, PI: Barrett & Wilson-Mendenhall, Co-I: **K. Quigley**, A First-person Experience Sampling Investigation of Desire and Self, 06/2014 - 05/2016. \$299,555 (total costs), Quigley: 0.5 calendar month/year.

VA-Health Services R&D PPO 14-144-2, PI: **K. Quigley**, Mobile Sleep and Pain Intervention for OEF, OIF and OND Veterans. 03/01/2015-02/28/2016. \$99,878 (total costs), Quigley: 2.4 calendar months/year. [ClinicalTrials.gov: NCT02392000](https://clinicaltrials.gov/ct2/show/study/NCT02392000)

Research Interests:

My current research is guided by the theory of constructed emotion. This theory rests on several key neurobiological and psychological constructionist ideas: (1) the brain implements a predictive model of its own body in the world; this model is built from prior knowledge developed over a lifetime of experience and constitutes the brain's "priors"; (2) the body is the 'effector' by which the brain obtains needed resources (e.g., food, water, oxygen, etc.); (3) the properly working internal model, prospectively predicts near-term energy needs as well as what might be needed for longer-term future use – importantly, an internal model that regulates energy intake and outflow for expected need is more metabolically efficient than a model that reacts to need; (4) the model can be adjusted or refined by unexpected, incoming information from two sources — exteroceptive inputs from the world (sight, sound, smell, touch, taste) and interoceptive sensations arising in the body (i.e., sensations from the viscera such as the heart, blood vessels, gastrointestinal system, lungs, and skin [via unmyelinated fibers]). This theory gives the body a key role in mental life, because a brain hears, sees, thinks and feels in the service of regulating energy utilization over time to support action and learning. To address key hypotheses generated by this theory, I use tasks designed to measure interoceptive ability, like heart beat detection, or affective inductions or motivated performance tasks while measuring cardiorespiratory and other autonomic measures. I also use behavioral and self-report methods to examine the role of the peripheral nervous system in creating emotion and affect (low-dimensional features of experience, such as feeling of being activated or calm; positive or negative). My applied lines of work focus on the physiological, behavioral and cognitive outcomes during stressors or threats, and health outcomes in those exposed to war or other major life events like terrorism threats. An exemplar study is my prospective study of individuals deploying to Iraq and Afghanistan. Here, we examined psychosocial variables such as trait negative affect and unit cohesion, a kind of military-specific social support, and physiological variables such as autonomic and cardiovascular measures as predictors of post-war, non-specific physical symptoms in soldiers returning from war. Newer work uses mobile technology to teach chronic disease self-management skills to reduce physical symptoms, and improve physical health functioning (e.g., improving sleep, reducing pain) in veterans.

In earlier work, I co-authored a model for quantifying and assessing autonomic control of cardiovascular responses to stressors in animals and humans, validated noninvasive indices of autonomic control of the heart for use in children and adults, and examined the early development of autonomic control of stressor-evoked cardiac function in an animal model. This work was critical in demonstrating that there are important system limits to the physiological measures that we use to reveal psychological mechanisms or processes, and that these limits must constrain our psychophysiological inferences.
