Projects for Honors in the Discipline may take a variety of forms but are expected to make a significant contribution to research or practice in a Major. A student proposing a project must have at least junior standing and a GPA of 3.5 or higher. The work of a project will be expected to cover two semesters and be equivalent to the work required by a minimum of 8 semester hours of academic coursework.

This cover sheet must be signed by you and your faculty mentor and department chair before being turned in for final review by the COS Associate Dean of Undergraduate Affairs.

The application packet will include:

- Proposal Cover sheet
- Unofficial transcript
- Research proposal

Section 1:

Student name ______________________________ NUID ___________________________
E-mail address _____________________________ Date ____________________________
Anticipated Graduation Date _________________________________________________
I am applying for Honors in ________________ Current GPA ______________________
Title of project ______________________________________________________________
Name of Honor Research Advisor ______________________________________________
Project may require following approval (check all that apply)
  ____Laboratory Safety Training  ____Radiation Safety Training
  ____Human Subjects Training and IRB Review

I have read and understand the requirements to complete Honors in Major ___Yes ___No
Section 2:

Please list course numbers, titles, number of credits, and semesters of courses to be taken in completion of the project (Ex. Fall 2016: BIOL4970 Junior/Senior Honors Project 1, and Spring 2017: BIOL4971 Junior/Senior Honors Project 2). [The use of courses other than 4970/4971 to fulfill this requirement will need an explicit exemption from the department and Dean’s Office.]

Section 3:

Please include the following information in your proposal document:

1. Project Description: The narrative should include the thesis or research question; a discussion of primary works and authors; theoretical framework; methodology and data sources, if relevant; significance of the contribution; and a clear statement of the rationale and goals of the final project. Additionally, a projected timeline by which intermediate goals will be met.

2. Is the project or part of the project being undertaken through co-op or other employment or internship? If so, please describe.

3. List all relevant previous work including courses, co-op, papers written for a class, etc.
Section 4: Signatures (Must be original signatures obtained by student)

_________________________________________   ___________
